Singapore National Eye Centre

## **Problem Statement**

A survey conducted in 2021 found that nurses in Singapore National Eye Centre (SNEC) Operating Theatre (OT) expressed dissatisfaction in two areas; ineffective picking of consumables and lumbered with additional workload. Through numerous ideas brainstormed and feedbacks from staffs, the Stagger Team (ST) Trolley was developed.

## **Potential Solutions**

Identifying the problem

It was found that SNEC Operating Theatre (OT) nurses were dissatisfied in 2 areas: ineffective picking of consumables and overwhelmed with additional workload.

#### Formulate ST trolley was

PDCA 1

formulated. Assigning one dedicated team

## **Project Aim**

To promote functional effectiveness with a standard process of preparing daily surgical consumables. Hence, lessening SNEC OT nurses' workload and to ensure effectiveness in consumables preparation.

### **Objectives**

Achieve cost efficiency □Increase efficiency and productivity Ease workload and facilitate workload

## Lessons Learnt

#### to prepare consumables for 10 OTs.

Consumables for various cases were prepared, providing convenience and reduction in time to prepare the theatre.

- However, First in First Out (FIFO) was difficult to maintain and some items were found to be expired.
- PDCA 2
- A central preparation area dedicated to the team and only Commonly used items were prepared. Further providing greater accessibility and convenience. Improving FIFO.
- Present . . .

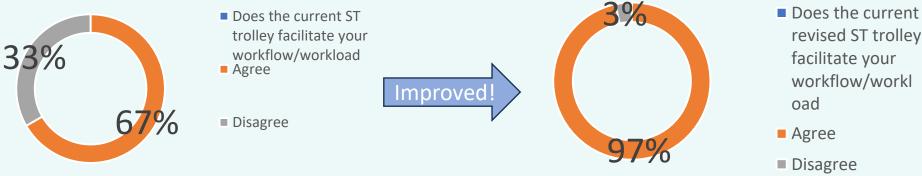

Л

Improved work satisfaction and enhanced productivity. Till date no expired items were found.

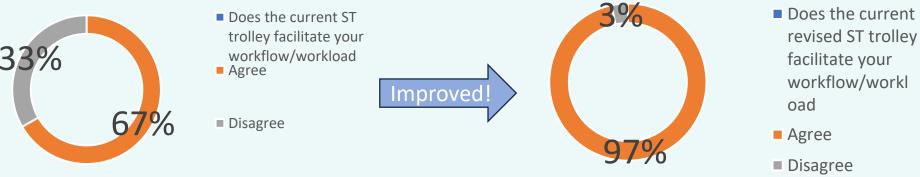

## **Outcomes & Impacts**

1. ST trolley had eased OT staff's workload and enhanced preparation of OT consumables. Survey results reported that 95% of the staff agreed that ST trolley plays a significant role in facilitating smooth workflow.

PDCA 1

#### **Challenges faced**

#### **1:Adaptation**

- Some staffs were slow in adapting to ST trolley which might slow down the implementation.

#### Solution

- Training sessions and a presentation was provided to slowly integrate the use of ST trolley.
- **2:** Resistance to change
- Some staffs were resistance or have doubts that the ST trolley could help improve their workload.

#### Solution

- Make them the champion of the project. To help them understand more about the workflow and understand the changes that ST trolley could reduce their workload.

### **Learning Points**

- Decrease in overall time taken to prepare consumables led to benefits in both staff wellbeing and organizational aspect. • Increased flexibility and predictability of working hours in PDCA 2 led to improve work life harmony and staff satisfaction. Leading to reduction in staff turnover & daily absenteeism rates.
- 2. Items returned to central ST trolley were minimal and time saved for each OT to prepare consumables is reduced by 400%. Moreover, there were 0% of items found expired till date after implementation of PDCA 2.
